

## Dog Waste Program

We are proud to be a pet-friendly community that offers a clean and comfortable living environment for everyone and their pets to call home.

Each dog will be required to come to the leasing office and provide a DNA sample, just a saliva sample taken with a Q-Tip rubbed inside the dogs cheek for 30 seconds.

That sample will be sent to a DNA lab in Tampa Florida and digitized so it can be later compared with any dog waste left on the property.

Participating residents will be all be given a DOGdex ID and have online access to their own dogs DNA results which can be used at any time to identify their pet. This is valuable and potential lifesaving information if a pet is ever lost, stolen or ends up in a shelter and needs to be identified.

This program called CRIME LAB® uses the same technology that the FBI uses for matching humans in criminal cases and is extremely accurate and effective.

Fines backed by DNA matches will be: first offense \$250 for dog waste found outside, each subsequent offense will increase by \$100 with a maximum of \$1000 per offense.

While this may seem like an extreme measure to stop the dog waste, nobody should ever have to deal with any other resident's dog's waste. Most people are responsible but occasionally someone isn't and it is not fair for other residents or staff to have to deal with this.

The tenant agrees to help maintain a dog waste free community. Landlord has implemented a per DNA registration program and tenant agree to participate in it. See the pamphlet attached \_\_\_\_\_ (initials)

Should you have questions, please call us at 815-623-1808 – as always, we're here to help!

Sincerely,

The Gardens on Prairie Rose
